* In June 98, TIF 2 took out a 5 year inter-fund note at 5.78% with the City (Industrial Development Fund) in the amount of \$145,000.

** In April 99, TIF 2 took out a 5-year inter-fund note at 5.50% with the City (Industrial Development Fund) in the amount of \$364,000.

*** In April 04, TIF 2 took out a 2 year inter-fund note at 1.5%, with the City (Industrial Development Fund) in the amount of \$450,000.

All inter-fund notes were paid off as scheduled.

**** In November, 2009 the City of Traverse City issued bonds in the amount \$8,000,000 for construction of the Old Town Parking Deck. The Bond Interest and Principal payments are reflected in the project expense column along with other Capital Improvements.

*In March 2002, the City of Traverse City issued bonds in the amount of \$11,070,000 for the following projects within the TIF 97 District: Park Street Development Project and State/Boardman Streets Streetscape. The Park Street Development Project had three components: Construction of a Parking Deck at State and Park, Park Street Entrance, Bricking and Streetscape and Utility Relocation. Beginning in FY 02/03, yearly interest and principal payments on the bonds have been made using resources from TIF 97 funds.

TAX INCREMENT FINANCING AN EXPLANATION

The Downtown Development Act, Act 197 of 1975, provides several methods for Downtown Development Authorities (DDA) to work in partnership with municipalities, property owners and developers to finance public improvements within a defined downtown area. These methods include; up to two mills being levied on DDA property owners, special assessments on property within the DDA, and Tax Increment Financing, commonly known as TIF. Although most people are familiar with millage and special assessment as methods of raising revenue, many people are not familiar with Tax Increment Financing. TIF is a financing tool whereby a specific area or district within the DDA is defined, a development plan is adopted, and the future property tax revenues are captured within that district to be used in financing the public improvements necessary to implement the development plan. TIF revenues may be the sole source of financing for these public projects or they may be used in combination with other financing methods.

The theory and primary goal behind the DDA legislation, which allows for the creation of TIFs, is to help cities correct and prevent deterioration of their business districts, encourage historic preservation and to promote the economic growth of the designated downtown area. Because most downtown areas are among the oldest sections of a city, upgrading and providing the new public infrastructure necessary to achieve these goals becomes a priority. Traditionally these costs had to be borne by cities alone, creating a major stumbling block to the success of these plans. As a solution to this problem, the DDA Act provided for the use of TIF, which sets up the mechanism for partnerships with other benefitting taxing units, who also have a stake in the health of a downtown area, thus ensuring a source of funds would be available to actually build the needed public improvements. Public investment spurs private investment creating the tax revenue to pay for the public improvements.

When a TIF district is put into place, its current taxable value is established and that becomes the value base for the length of the TIF's existence. This taxable value base is also the value base for all of the taxing units who contribute to TIF. For as long as the TIF District exists, the City will continue to receive the revenues that would normally be generated by this taxable value base. It must be noted that the amount of revenue received also depends on the annual millage rate adopted by the City. In the years after the district has been established, the revenues generated from the difference between the new annual taxable value and the value base are placed into the TIF Fund and used for the specific public improvements listed in the development plan. Again the amount of revenue contributed each year depends on the TIF district's annual taxable value and the annual millage rate established by the participating taxing units.

Hopefully, the following hypothetical example helps in the explanation:

	Year 1	Year 2	Year 3	Year 4
Taxable Value of Property	\$1,000,000	\$1,100,000	\$1,200,000	\$1,250,000
Taxable Value Base	1,000,000	1,000,000	1,000,000	1,000,000
Difference for TIF	0	100,000	200,000	250,000
Tax Rate for City	13 mil	13 mil	13 mil	13 mil
Tax Rate for Other	12 mil	12 mil	12 mil	12 mil
Revenue to City	\$ 13,000	\$ 13,000	\$ 13,000	\$ 13,000
Revenue to Other	12,000	12,000	12,000	12,000
Revenue to TIF - public project	0	2,500	5,000	6,250
Revenue deferred from City	0	1,300	2,600	3,250
Revenue deferred from Other	0	1,200	2,400	3,000

In this example, taxable value increased each year and the tax rate remained the same. There could also be a situation where the taxable value and/or the millage rate within the district decreases. While the City's General Fund did not receive \$1,300 in Year 2, \$2,600 in Year 3 and \$3,250 in Year 4, the total revenue was still collected from the property owners, there was no reduction in the amount of taxes paid. All property owners within the TIF District paid the same amount of taxes that would have been paid and at the same millage rate as the property owners that were not part of a TIF District. The only differences is that these revenues were placed into a TIF Fund and earmarked for a specific project of the development plan. In addition to the City's revenue, \$1,200 in Year 2, \$2,400 in Year 3 and \$3,000 in Year 4 was also received from the other contributing taxing units to be placed into the TIF Fund. From the above example, for every \$1.00 contributed by the City's General Fund, \$.92 was matched by the other contributing taxing units to be spent on city infrastructure within the DDA.

Without the tool of TIF, necessary public improvements would have to be financed completely by the City. The TIF funds collected must be earmarked or spent on a specific development project or necessary administrative expenses within the District. If it should be determined by the DDA Board and City Commission that neither of these options are necessary, then, as required by the DDA Act, the funds collected for that year are returned to the contributing taxing units. At the completion of the TIF plan, all taxing units again levy millage on and receive revenue from the full taxable value of the district.

For a real life example, one of the existing TIF districts within the Traverse City's DDA is TIF 2 in the Old Town area of Downtown (map attached). From the creation of TIF 2 in 1985 through June 30, 2006, \$3,228,168 has been contributed by taxing units for use within that district. Of this amount collected in the 20 years, \$351,920 was returned to the taxing units because it was determined by the DDA and City Commission that there were no specific projects or necessary administrative expenses for which these funds should be spent. Of the remaining \$2,940,387 retained by the TIF 2 Fund, \$1,404,207 has been

contributed by the City and \$1,472,041 has been contributed by other taxing units.

During that time, infrastructure projects which were completed within the TIF 2 District include:

- * streetscapes on Union Street in the Old Town area;
- * 8th Street Project which included landscaping and sidewalks from Union Street to Lake Street and the Cass Street corner improvements;
- * developments related to the River's Edge Project which included utility relocation, river bank landscaping, riverwalk and streetscape;
- * streetscapes and other renovations on Lake Street; and
- * riverwalk on the Boardman river along the Mid-Town Development.

The TIF Fund did not pay for 100% of these project, their partnership with grants, special assessments and utility funds helped to provide over \$3,507,319 in City infrastructure and environmental improvements.

The use of TIF is just one of several economic development tools available to help and assist in keeping the core of our cities alive and healthy both economically and socially.
